Forecast for Saturday 30 Dec 2023

Weather: Cloud thickening and lowering through the morning. Persistent snow and summit gales reaching western ranges late morning, then the Cairngorms by the afternoon. Snow turning to rain below 400m around dusk, then below 900-1000m in the evening. Rain and summit snow turning light and patchy towards midnight.

Chance of cloud-free hill tops above 800m: 70% in the morning. 20% in the afternoon.

Low cloud and visibility: Very good visibility in the morning with the main cloud base well above the summits. Some patchy cloud around 1000-1100m. Cloud quickly lowering to 800-900m as snow arrives, with patchy cloud likely to affect lower south and east aspects. Near zero visibility in blizzards on the hills.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

Extremely challenging conditions on the hills with near zero visibility, heavy snow and severe summit gales making any progress very difficult, especially at higher levels. Note, freezing levels around 200m higher across the Cairngorms.

Forecast for Sunday 31 Dec 2023

Weather: Dull and grey with persistent low cloud and frequent mainly light snow flurries, falling as rain below 700m, in the south across Ben Alder and to the south of the Cairngorm plateau. Largely dry in the north with some bright or sunny spells, best of these across the Monadhliath hills. All areas turning drier with a few cloud breaks in the evening.

Maximum wind: Southeast 15 gusting 20 mph, 30 mph at first in the west. Becoming northeast 10 mph in the evening.

Chance of cloud-free hill tops above 800m: 10-20% in the south, 30% in the north

Low cloud and visibility: Generally very poor visibility with persistent low cloud, with cloud bases around 400-500m, but bases around 700-800m in the north across the Monadhliath hills with a few breaks possible. Best chance of clear summits at midnight to the north of the Cairngorm plateau.

Temperature: **Glens:** Plus 1 Celsius, falling to zero Celsius in the evening.
At 800m: Minus 1 Celsius falling to minus 3 or 4 Celsius in the evening.
Freezing level: 800-900m.
